CARBURETTOR KITS OVERVIEW & VEHICLE LISTING

Control Instruments Automotive carburettor kit program, marketed under the Echlin brand, is widely acknowledged as one of the most comprehensive in the industry.

Echlin has been a leading brand for over 60 years and covers an expansive range of carburettor kits and components for a wide range of older makes and models of vehicles.

The product range that is highlighted in this section covers Echlin carburettor kits and components for a variety of older South African passenger cars and light commercial vehicle applications. Vehicle manufacturers are listed in alphabetical order by make, model and derivative, year and engine types. From here the relevant carburettor type and part numbers for the carburettor kit, diaphragm and needle and seat are listed for easy reference.

PARTS LISTING - CARBURETTOR KITS

Carburetors are relatively simple devices and their primary function is to deliver the correct proportion of fuel and air mixture at a given throttle opening (as selected by the vehicle driver).

However, as with all mechanical devices, carburetors will wear over time and will also require periodic tuning and service by a technician ensuring the carburettor gets the mixture just right.

This section allows for quick reference from Carburettor Kit part numbers listed in alpha numerical order to determine the correct vehicle application with relevant needle and seat part numbers referenced for quick identification.
